IT'S ALIVE

ENERGY PULSES THROUGH
FRANKENSTEIN L.E., THE FIRST EDITION
IN THE MONTEGRAPPA UNIVERSAL
MONSTERS COLLECTOR SERIES!
PREPARE TO FACE YOUR FEARS!!
MASTER THE MONSTER WITHIN!!!

Vintage Hollywood staging and mechanical mayhem are the base ingredients for a homage to one of history's great horror icons. We revisit the magic of Universal Pictures' 1931 classic in an XXL edition made with brass, resin and contraptions conceived by writing's most maniacal minds.

Montegrappa's own strain of mad mechanical science brings Frankenstein's creation back to life with props and special effects devised to re-animate the senses. Creative craftsmanship and audacious engineering evoke old-school filmmaking energy on Frankenstein L.E. Heavens above! We've created a monster!!

Discover the monster within!

Frankenstein's macabre creation lies within a curio chamber cast in brass.

A miniature handwheel uses old-school theatrics to relive one of cinema's most epic character reveals.

Spin the fidget gyro gizmo while you scheme!
Montegrappa mechanical complications are every inventor's dream.

Gritty electroplating and kinetic contraptions bring movie magic to writing. The illusion of lo-fi, mad-scientist workmanship conceals the mechanical genius of Power-Push fountain pen filling.

The most monstrous Montegrappa of the modern era!
